## Personal profile

- Master's degree in Environmental engineering with six years' experience teaching variety of petroleum and environmental engineering related subjects.
- I am an honest and reliable employee with a keen eye for detail and excellent time management skills. I enjoy a team environment and am constantly pushing myself to learn new skills.
- Ready to move to a more challenging and motivating work environment.

## Key skills and qualities

- **Carrying out administrative or clerical tasks, such as typing, filing or preparing documents (letters, reports or papers)**  
Beside my job duties as a teaching assistant I was also responsible for extra paper work such as following students' registration, and preparing stage reports for the teaching progress of the courses.  
Moreover I have typed and coordinated a 15000 words dissertation single handedly without any outside assistance.
- **Using organizational or planning skills**  
When I was a student I had to work at the same time in order to be able to afford the tuition fees and to fend myself which was extremely difficult at that time!! But at the end I managed to emerge successful on both.
- **Programming or working in programming languages**  
Excellent with Matlab Mathwork™ software package as I used it to process multiple sets of data and produce the needed figures for my Master dissertation.
- **Presenting ideas or information in oral form**  
During the Master stage I had to perform many presentations either individually or within a group of colleagues which helped me well to develop so many presentation skills.
- **Supervising or leading individuals or groups of people**  
During my undergraduate and postgraduate study I was involved in many groups in order to fulfill coursework duties or graduation projects being the leader of all these groups in terms of distributing, supervising and collecting tasks from other group members.

## **Personal achievements**

- 2008 Schlumberger petroleum engineering students' award.  
Award which given to the most distinctive students based on their Cumulative Grade Point Average (CGPA).
- 2011 Elite postgraduate scholarship.

## **Work experience**

**January 2008 - December 2012**

**Sudan University of Science and Technology (SUST), Khartoum - Sudan**

Teaching Assistant

Supervising students' lab works.

Giving tutorials to the B.Sc. and diploma students

**December 2012 - Current**

**Sudan University of Science and Technology, Khartoum - Sudan**

Lecturer

Teaching all the related environmental engineering and safety subjects

**October 2013 - Current**

**Sudan University of Science and Technology, College of Petroleum Engineering and Technology, Khartoum - Sudan**

Head of Petroleum Exploration Department

## **Education and training**

**University of Nottingham**

**September 2011 - October 2012**

Nottingham - UK

M.Sc. in Environmental and Resource Engineering

Have studied a cocktail of environmental engineering topics including:

Advanced environmental assessment (focus on how to conduct an Environmental Impact Assessment (EIA) and construct an Environmental Impact Statement (EIS)).

Water and wastewater treatment engineering

Contaminated land's reclamation

Air pollution abatement and control

Carbon Capture and Storage (CCS)

**Sudan University of Science and Technology**  
**September 2002 - September 2007**  
Khartoum - Sudan

B.Sc. in Petroleum Engineering

**Interests and hobbies**

I like to spend time with my friends and family.

I also like to read different books regularly.

Browsing the internet

Playing and watching football.
